RHUZZEL PARAMIO

Metro Manila, Philippines | 09762433672 | boyparamio@gmail.com | rhuzz.online

PROFESSIONAL SUMMARY

Full-stack developer and QA specialist with a B.S. in Computer Science (Software Engineering), building and shipping production web platforms in Laravel, Vue 3, Next.js and WordPress, including AI features (Google Gemini) and workflow automation (n8n, Zapier). Currently a Junior IT Architect delivering websites, internal tools and workflow automation (n8n) for domestic and international clients. Previously automated testing with Selenium, Playwright and Jenkins at Reed Elsevier, and built a HIPAA-compliant care platform end to end.

EXPERIENCE

Junior IT Architect (Contractor), Prisma International Corporation (Prisma Languages) *April 2026 – Present*

- Lead developer of the Prisma Languages and LGIS Group web presence: custom Elementor components in HTML, CSS and JavaScript, including scroll-animated stat counters and an interactive D3.js/TopoJSON coverage map.
- Built an interpreter booking and matching automation on n8n, PostgreSQL and Gmail with geocoding fallbacks, AI-assisted request extraction, availability-confirmation email loops and duplicate prevention.
- Resolved a WordPress security compromise at LGIS Group (rogue admin, backdoor files, exploit attempts) and managed the site's domain migration.
- Fixed Twilio A2P 10DLC SMS compliance for Prisma Languages: opt-in flows, required support pages and Forminator form configuration.
- Built and maintained voluntary-disclosure forms in WordPress/Forminator and web components for the Cinema Alliance site.

Mid Full Stack Web Developer | QA Specialist (Freelance) *February 2025 – October 2025*

- Built a HIPAA-compliant elderly-care web application with Next.js, Tailwind CSS, Prisma and PostgreSQL, owning both front end and back end.
- Implemented authentication, responsive UI components and optimized database structures for secure handling of patient data.
- Wrote QA test plans and documentation and tested releases before delivery.

Software QA Intern, Reed Elsevier Shared Services Philippines Inc. *December 2023 – July 2024*

- Tested manually and with automation: Selenium WebDriver (C#) and Playwright (C#) suites that widened test coverage.
- Ran automated tests in Jenkins CI/CD pipelines and wrote automation documentation.
- Kept test scripts under Git version control and worked with the team on pre-release quality checks.

Junior Software Engineer | QA Specialist (Freelance) *September 2023 – February 2024*

- Completed assigned development and QA tasks independently and handled confidential client information with discretion.

PROJECTS

OmniPOS, multi-tenant web POS *omnipos.shop*

Laravel 12, Vue 3 (TypeScript), Inertia.js, Tailwind CSS, PostgreSQL

- Designed tenant-isolated architecture so multiple businesses and branches share one platform with separate data and subscriptions.
- Built a real-time POS interface that cut checkout time by about 30%.
- Added inventory and branch management, role-based access control, shift management, reporting dashboards and a Kitchen Display System.

AirZen, indoor air quality monitoring web app

Laravel, Vue, PostgreSQL, ESP32, Railway

- Rebuilt my college thesis into a live web app: ESP32 sensors (temperature, humidity, CO, CO2, dust) post to a Laravel API that computes AQI with the EPA breakpoint formula and returns recommendations.
- Deployed to a custom domain on Railway with a gauge dashboard.

Rhuzz Command Center, desktop monitoring app

Tauri

- Desktop app that tracks the health of my web apps and bundles general and developer tools.

Whale Wallet, personal finance app *whale-wallet.cloud*

Laravel 13, Vue 3, TypeScript, Inertia.js, Tailwind CSS 4, PostgreSQL, Google Gemini, Railway

- Built a finance app for Philippine users that forecasts balances from bills, subscriptions and spending to show a daily safe-to-spend amount until payday.
- Added an AI assistant (Google Gemini) that logs expenses, reads GCash, Maya and bank receipts, and edits bills by chat, with every quoted figure checked against the user's data.
- Secured with two-factor authentication and passkeys; exposed a REST API for a companion mobile app; covered by about 250 PHPUnit tests and deployed on Railway.

Portfolio *rhuzz.online*

Next.js, Tailwind CSS

TECHNICAL SKILLS

- **Languages:** PHP, TypeScript, JavaScript, C#, Python, Java, C++
- **Front end:** Vue 3, React, Next.js, Angular, Tailwind CSS, Bootstrap, Inertia.js, HTML/CSS
- **Back end and data:** Laravel, Node.js (Express), .NET, PostgreSQL, MySQL, Drizzle ORM, Prisma
- **CMS and automation:** WordPress, Elementor, Forminator, Twilio (A2P SMS)
- **Testing and DevOps:** Selenium (C#), Playwright (C#), Jenkins, JMeter, Postman, Azure DevOps, Git, GitHub, Bitbucket, Railway
- **Design and tools:** Figma, Jira, Tauri
- **AI and automation:** LLM integration (Google Gemini API), AI receipt reading and chat assistants, AI-assisted data extraction, n8n, Zapier, Twilio; Claude Code, ChatGPT, Gemini, Grok for development and productivity
- **Languages spoken:** English (professional), Tagalog (native), Ilokano (conversational)

EDUCATION

B.S. in Computer Science, Specialization in Software Engineering *August 2020 – November 2025*

FEU Institute of Technology, Manila

TVL, Information and Communications Technology (with honors) *June 2018 – March 2020*

Panpacific University, Tayug, Pangasinan

CERTIFICATIONS

- Cisco DevNet Associate (2022); Cisco CCNA: Introduction to Networks (2022)
- Python and Java, IT Specialist (2022, 2021)
- Cisco: Introduction to Cybersecurity and Introduction to Data Science (2024)
- Google Cloud: Introduction to Generative AI badge (2024)

LEADERSHIP

- **Public Relations and Logistics Officer**, FEU Tech Student Coordinating Council (August 2023 – August 2024)
- **Director of Logistics**, Junior Philippine Computer Society, FEU Tech Chapter (August 2021 – August 2023)
- Volunteer: DevCon Pro (Logistics Committee, 2023); FEU Tech Mangrove Tree Planting (2024)
